Menu Boards Designed and Created to Match Your Needs and Tastes

Chalk Talk offers a creative alternative to computer generated signage. Our menu boards are custom designed and made to order in any shape or size for each client. From start to finish our boards are hand-drawn by a team of talented artists so the possibilities are endless. We offer a full range of products from full-sized menu boards to "Specials" boards, free-standing and specialty signage. All of our work is sealed to protect the art work and text from smudging. Pricing is applied in regular chalk after the sealant so you, the client, can make price changes as needed. For maximum flexibility you can choose our "slats" option that allows changeable/ replaceable menu items. This is best for some of our clients who are still experimenting with their menu offerings or just have a need to change menu on a regular basis. You can order your Chalk Talk menu board framed or unframed. Just choose from our selection of prefinished frames to cap off a fantastic, functional piece of art that will not only liven up your interior decor but also help your customers make better, quicker menu selections.
